# What makes us different?

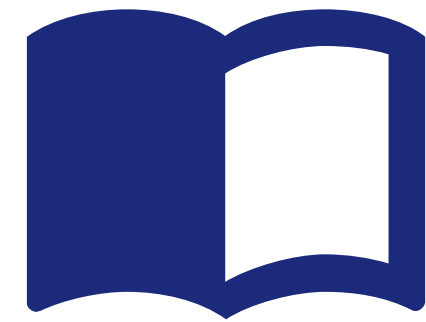

- Here at Cloud After Dark, we are professionals working in the cloud industry, so we understand cloud at a deeper level. This is what makes us different, we not only know theory but we know cloud from a technical application standpoint. Theory is good, but hands on experience is better!

# Our Approach

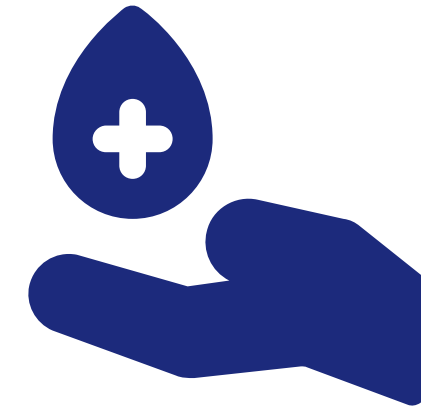

## Individual attention

It's just you and the instructor. We offer 1:1 teacher/student approach.

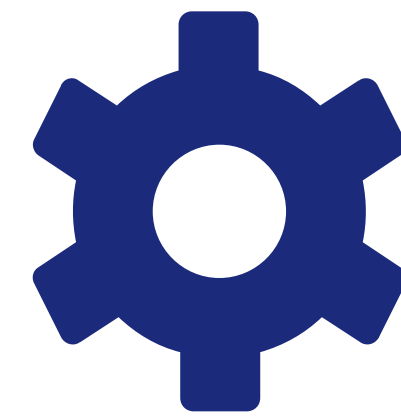

## Theory

We help you understand the what and the why.

## Hands on

We walk you through labs and explain each step to help you get a deeper understanding.

## Concept integration

We help you understand how each tool and service can be integrated. This will help you see the big picture.

# Why Cloud

## Growth

The cloud industry is booming right now. The cloud computing Industry is projected to grow from \$371.4 Billion in 2020 to \$832.1 Billion by 2025.

## Salary

Junior level cloud jobs start from 80k to 100k and go up from there.

## Demand

Companies are moving from on premises datacenters to the cloud at a high velocity because of the cost saving and the automated scalability.

# Services
